

**Career Objective:** Work in a firm that welcomes creativity and innovation, has a professional work driven environment that allows me to use my technical knowledge, and enable me to grow, while fulfilling organizational goals. My goal is to be a Front-end Web Developer and Designer by creating websites that are user/client friendly for website navigation. Focus on dynamic, less cluttered, responsive webpages for outstanding user experience.

**Summary:** Front End Web Developer with a background in Special Education and Full Stack Certification from Georgia Tech. Enthusiastic learner and passionate about applying my technical knowledge to Frontend Web Development and Web Designing. My 25 years of teaching experience and Master's in Psychology has taught me organizational and planning skills, stretching beyond to meet deadlines, and foresee upcoming issues and solve them through critical thinking and analysis. My work ethics, my passion to learn new skills and my perseverance in taking up challenging tasks, has always taken me to new heights in my career. Learning is an adventure that has no boundaries and I truly believe that determination and passion for acquiring knowledge, no matter what phase of life, always yields positive results.
